

Referral & Scope Pathway Template

Name your professional boundary and referral route. Do not enter identifiable patient data.

My scope statement

Trigger for medical assessment / urgent escalation

Who does what, in what order, and who informs the person

Handover, confirmation received and follow-up owner

Safety note: new exertional chest tightness needs prompt medical assessment. Ongoing, severe or concerning symptoms need emergency help. Stop coaching and do not speculate about the cause.

Richard checkpoint 16: map cardiovascular-risk screening, including one risk if the pathway breaks.
